Environmental Process

Transportation Research Circular Number EC069, Critical Issues in Aviation and the Environment at 18

August 2004

The *Critical Issues in Aviation and the Environment* series is an ongoing, peer-reviewed initiative by the Transportation Research Board to characterize the current state of knowledge and critical needed research regarding important topics relating to the effects of aviation on the environment. The Environmental Process paper written by John Putnam identifies current critical issues relating to NEPA review of aviation projects, environmental streamlining, and environmental management.
