

KAPLAN KIRSCH ROCKWELL

## Central 70

Kaplan Kirsch & Rockwell represents the Colorado Department of Transportation (CDOT) both as P3 procurement counsel and as environmental/litigation counsel for a complex and controversial project to replace an aging interstate viaduct in central Denver with a below-grade, covered segment of the interstate with greater capacity. As part of this project, our attorneys have structured the procurement documents and the associated construction project documents required for completion of this major highway construction project. In addition, we have addressed Title VI complaints, National Environmental Policy Act (NEPA) issues, Section 4(f), Section 106, and Transportation Conformity issues under the Clean Air Act in the face of expected litigation.
